Are you using MICROFIBER?

If you don't already use microfiber, you might be wondering what the big deal is. The strands in microfiber are split, causing them to flare out. Think of these strands as hands, the more hands you have, the more you can pick up. In comparison to cotton, microfiber is more absorbent, leaves no residue, and has a longer lifespan. Sounds like a no brainer to me!

Microfiber Mops

Microfiber premium tube mops are a great alternative to traditional cotton mops. They are able to be washed and reused over and over again giving you the most for your money. A 7" scrubber band at the top of the mop gives you the ability to tackle hard to clean debris.
